

Power Ore Posts Webinar on Opemiska’s Disseminated and High Grade Copper Mineralization

Toronto, Ontario – February 21, 2019 – Power Ore Inc. (“Power Ore” or the “Company”) (TSX.V: PORE) is pleased to announce that it has posted an investor webinar on the Opemiska Copper Mine Complex in Quebec. The focus of the webinar will be on information released over the last few weeks, specifically:

- High Grade & Long Intersections of Near Surface Copper and Gold Mineralization
- Near Surface Disseminated Copper and Gold Zones
- Crown Pillar Mineralization
- In Place Infrastructure
- Power Ore’s Near Term Objectives for Opemiska

This webinar is available, at any time, via the link below:

About Opemiska Copper Mine Complex

The Opemiska Copper Complex is located adjacent to the town of Chapais, Quebec within the Chibougamau region. Opemiska is also within the Abitibi Greenstone belt and within the boundaries of the Province of Quebec’s Plan Nord which promotes and funds infrastructure and development of natural resource projects. The project consists of 11 mining claims and covers the past producing Springer & Perry mines which were owned and operated by Falconbridge. The project has excellent in place infrastructure including a powerstation and direct access to Highway 113 and the Canadian National Railway.

Opemiska was mined by Falconbridge as a high-grade underground mining operation, and was in production for over 35 years prior to Ex-In acquiring the property in 1993.
